

Exercise 6A & 6B - Git Operations Report

Name: Omer Erzurum 78097

Exercise Title: Git rm, Undo, Amend, and Rebase Practice

Repository: git_reset_test

Exercise 6A - Git rm and Undo

1. Used the repository created in Exercise 5
2. Played with git rm:
 - Removed the file reset_lifecycle_file using git rm -f.
3. Undid git rm operation:
 - Restored the staged file using git restore --staged reset_lifecycle_file.
 - Restored the working directory file using git restore reset_lifecycle_file.
4. Committed the changes:
 - Commit message: "Practiced git rm and undo restore".

Exercise 6B - Amend Commit Message and Rebase

1. Used the repository from Exercise 6A.
2. Changed the message of the last commit:
 - New commit message: "I can change the last commit message".
3. Tried to play with git rebase in interactive mode:
 - git rebase -i HEAD~3 could not be executed because there was only one commit left.
 - No squash operation was needed.

Conclusion

All tasks for Exercise 6A and 6B were successfully completed. The repository was properly modified and analyzed.
